

Corrections and Community Supervision

2012 Inmate Releases

Three Year Post-Release Follow-Up

2012 Inmate Releases: Three Year Post Release Follow-up

Return-to-custody data are presented for inmates released from the New York State Department of Corrections and Community Supervision (DOCCS) in 2012. This includes inmates who were released from parole program facilities¹ as well as those released from correctional facilities.

Return rates are based on a three-year follow-up period and are analyzed relative to several demographic and legal history characteristics. Return rates among the 2012 release cohort are compared to those found for an aggregated release cohort covering 1985 to 2012. Trends in rates of return among the annual release cohorts since 1985 are also presented.

¹ These alternative treatment program facilities include the Willard Drug Treatment Campus facility and the Edgecombe Residential Treatment facility. Technical violators began participating in a 90-day alternative drug treatment program at Willard in November 2007 and in a separate 30-day alternative drug treatment program at Edgecombe in December 2008 (which was later extended to a 45-day program in April 2010). Both parolees and inmates can be housed in these facilities, but only the inmates are included in this report.

EXECUTIVE SUMMARY

Return Rates. Among the 23,346 inmates released in 2012, there were 9,953 (43%) offenders who returned to DOCCS' custody within three years, including 9% recommitted with new felony convictions and 33% returned for parole violations. Since the 1996 cohort, the total return rate has been fairly stable at approximately 40%, with increasing violation rates and decreasing new conviction rates (see **Table 2**, p.3 and **Figure 2**, p.4).

Release Type. Offenders released by a decision of the Board of Parole returned at a higher rate (52%) than offenders released at their conditional release dates (40%). Offenders released at the maximum expiration of their sentence, who can only return for a new felony conviction because they are not subject to return for parole violations, had a return rate of 18% (see **Table 2**, p.3 and **Appendix A**, pp. 34-36).

Time to Return. Of the 9,953 offenders returned to custody, 85% returned within the first 24 months after their release (see **Table 3**, p.5). Overall, the median time to return was 11 months. The median time to return was 20 months for new commitments and 9 months for parole violators. The median time to return has become shorter since 1985 releases (see **Figure 3**, p.6). This has been primarily due to a decrease in the median time to return among parole violators.

Gender. Women had a much lower rate of return (31%) than men (43%). The difference in female and male return rates was evident for both new convictions (5% vs. 10%) and parole violation returns (26% vs. 34%) (see **Table 4**, p.7 and **Figures 4.1** and **4.2**, p.8).

Release Crime. The return rate of VFO's was 46% and the return rate of "Property and Other Offenders" was 42%. Individual crimes with the highest return rates included Burglary 2nd (57%), Robbery 2nd (56%), Possession of Stolen Property (52%), Other VFO Sex Offenses (52%), and Burglary 3rd (52%). Individual crimes with the lowest return rates included Business Corruption (7%), Criminally Negligent Homicide (12%) and Murder (12%) (see **Table 5**, p.10).

Readmission Crime. Offenders who returned for the commitment of new crimes were most often returned for new Drug Offenses. Thirty-one percent of the 2012 releases returned with new felony convictions committed Drug Offenses, 29% were returned for Property and Other Offenses, 27% were convicted of Violent Felony Offenses, and 13% were convicted of Other Coercive Offenses (see **Table 6**, p.14).

Age. Younger offenders returned to DOCCS' custody at a higher rate than older offenders. Over half (57%) of the offenders released in 2012 who were under 21 years old returned, while 42% of the offenders 21 years of age or older returned (see **Table 7.1**, p.16).

Criminal History. The return rate increased as the number of prior felony convictions increased. Among the 2012 releases, 39% of offenders with no prior conviction returned within three years, while just over half (51%) of the releases with four or more prior felony convictions returned (see **Table 9.2**, p.21).

First vs. Previous Releases. Offenders who had no prior releases on their sentence were less likely to return (38%) than offenders previously released and returned (51%) (see **Table 10**, p.22).

Region. Among the 2012 releases, offenders committed from Upstate Urban counties were more likely to return (49%) than offenders from other counties in New York State (45%), Suburban New York City (42%), or New York City (39%) (see **Table 11**, p. 26).

SECTION ONE: RELEASES AND RETURNS

The following report presents return-to-custody information on a cohort of inmates released from facilities of the New York State Department of Corrections and Community Supervision (DOCCS) in 2012.² Each offender was followed for three years after release. Return-to-custody data for the 2012 cohort is compared with earlier annual cohorts, beginning with 1985, as well as a cumulative cohort covering 1985-2012 releases. The return rates by several demographic and legal history variables are assessed. Finally, a partial follow-up analysis is presented for 2012 and 2013 releases.

Description of the Release Cohorts

There are several types of releases from DOCCS' facilities. For example, offenders may be temporarily released to a mental health facility, non-citizen offenders may be deported, offenders may be paroled or they may complete their sentence. As in past reports, this follow-up study includes only the sanctioned release or discharge of an inmate to the community due to:

- a) the expiration of a sentence with no requirement of supervision in the community;
- b) the inmate's release by authority of the Board of Parole;
- c) the inmate's conditional release, which is required by statute after the inmate has served his or her maximum or determinate sentence less any earned good time credits.

The release which triggers inclusion in the follow-up is not necessarily the first time the inmate was released from DOCCS' custody while serving the current sentence. The 2012 cohort includes some offenders who were released to parole supervision prior to 2012, but who then returned to DOCCS as parole violators before their re-release during 2012.³

Returns to New York State DOCCS' Custody

Although there are many ways to measure recidivism (e.g., re-arrest, re-conviction, and re-incarceration), this study defines recidivism as a return to DOCCS' custody as an inmate. Once an inmate is given a sanctioned release to the community, there are two ways that he or she can be readmitted to DOCCS' custody. A *New Court Commitment* returns to DOCCS' custody after receiving a new felony conviction and a new sentence. A *Returned Parole Violator* (RPV) is returned to DOCCS' custody to continue serving time on a remaining sentence after having seriously violated the conditions of post-release community supervision or parole supervision.⁴

Return rates are related to release type; parolees and conditional releases remain under community supervision until the maximum expiration of their incarceration and post-release supervision

² In April 2011, the Department of Correctional Services and the Division of Parole merged to become the Department of Corrections and Community Supervision (DOCCS).

³ One thousand ninety-eight of these re-released offenders had previously returned to custody to participate in an alternative treatment program, either the 90-day program at the Willard Drug Treatment Campus or the 45-day program at Edgecombe. These returned parole violators had been given a time assessment by an administrative law judge, but served a shorter amount of time (90 or 45 days) and were re-released after successfully completing the program to which they were assigned.

⁴ New York currently has a mixed sentencing structure. Over half of the 2012 releases followed for this report (56.3%) were sentenced under New York's determinate sentencing policy, serving 6/7 of the sentence and then serving imposed post-release community supervision. Offenders who received indeterminate sentencing serve some portion of their sentence in prison and then remain under parole supervision until the maximum expiration of their sentence. For more detail, see Article 70, Sentences of Imprisonment, New York State Penal Law.

sentences and therefore may be returned to DOCCS' custody for violating the rules of parole supervision as well as for a new felony conviction. Offenders who complete their maximum sentence, however, are not under parole supervision after their release, and can only return for committing a new felony offense.

The 2012 Release Cohort

As shown in **Table 1**, there were 23,346 inmates who were released from DOCCS during calendar year 2012. Of these, 9,372 (40%) were released to parole supervision as a result of an action by the Board of Parole,⁵ 11,484 (49%) were released to parole supervision on their conditional release date, and 2,490 (11%) were released after serving the maximum time on their sentence.

Table 1
2012 Releases: Returns to Custody by Type of Release

RELEASE TYPE	TOTAL RELEASES		RETURNS		NO RETURN	
			#	%	#	%
TOTAL	23,346	100.0%	9,953	42.6%	13,393	57.4%
PAROLE	9,372	40.1%	4,866	51.9%	4,506	48.1%
CONDITIONAL RELEASE	11,484	49.2%	4,648	40.5%	6,836	59.5%
MAXIMUM EXPIRATION	2,490	10.7%	439	17.6%	2,051	82.4%

Overall, 43% (9,953) of the 2012 releases were recommitted to DOCCS within three years of release; the return rate for the 2012 cohort is similar to the rate recorded for the 2011 releases. Since the 1996 cohort, the total return rate has been stable at approximately 40% (see **Figure 2** and **Appendix A**). Among the 2012 releases, 18% of the maximum expiration releases returned to DOCCS' custody within three years, compared to 40% of the conditional releases and 52% of the paroled offenders. This relationship has been consistent since the release cohort of 1999. Offenders released due to the maximum expiration of their sentence return at a lower rate because they are not subject to return for rule violations.

⁵ Besides offenders who were first-released by decision of the Board of Parole after serving their minimum sentence, included in these releases are offenders who were re-released back to Community Supervision after participating in an alternative drug treatment program as a returned parole violator as well as offenders re-released to post-release supervision whose release date was determined by an Administrative Law Judge.

SECTION TWO: RETURN RATES BY RELEASE TYPE AND READMISSION TYPE

Table 2 presents return rates by readmission type for the 2012 releases and for the cumulative release cohort of 1985-2012 releases (data for individual years are provided in **Appendix A**). Within three years of release, 33% of the 2012 releases were returned for rule violations and 9% returned with new felony convictions.

The percentage of the cohort released by action of the Board of Parole has decreased over time; among the 2012 releases, 40% were released by the Board, compared to 65% of the combined 1985-2012 cohort.⁶ Among both cohorts, paroled and conditionally released offenders were more likely to be returned for rule violations than for new felony convictions. Forty-three percent of the offenders released by the Parole Board during 2012 were returned for rule violations within three years and 8% returned for new felonies. Similarly, among the 2012 conditional releases, 32% were returned as parole violators, while 8% were returned for new crimes. The return rate for rule violations is higher among parole releases than among conditional releases. This is because most conditional releases are first releases whereas the majority of parole releases are not⁷, and offenders who had no prior releases on their sentence (first releases) tend to have a lower recidivism rate than those who had prior releases.

Table 2
Returns for New Felony Offenses and For Violations of Parole:
Inmates Released in 2012 and 1985-2012

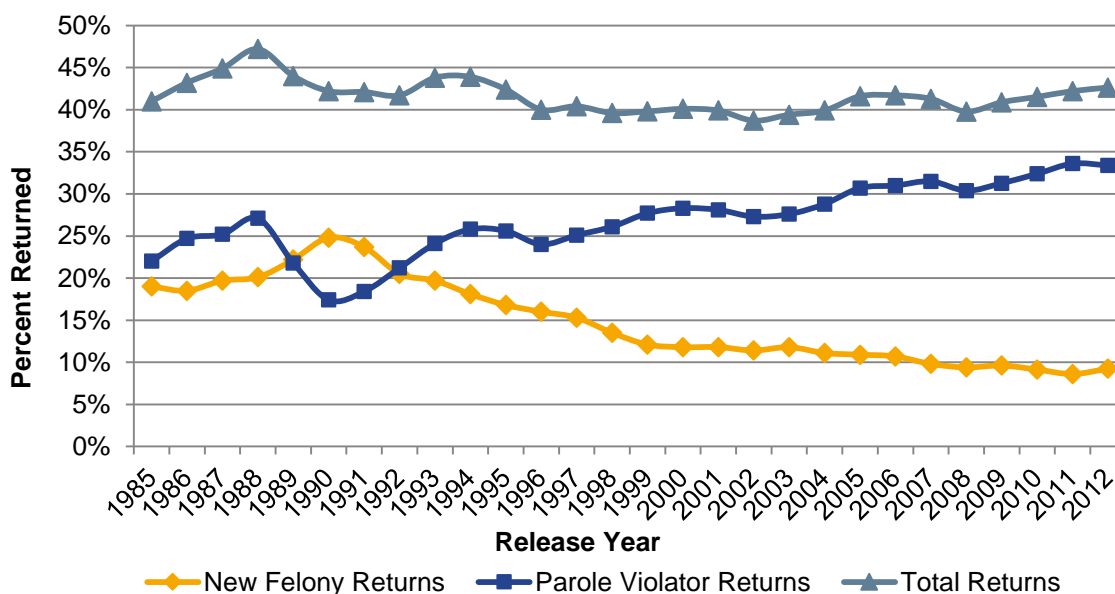

RELEASE TYPE AND RELEASE COHORT	TOTAL RELEASED		TOTAL RETURNED	RETURNED: NEW COMMITMENT	RETURNED: PAROLE VIOLATION
	#	%			
2012 RELEASES	23,346	100.0%	9,953	2,158	7,795
% (return/release)	100.0%		42.6%	9.2%	33.4%
PAROLE	9,372	40.1%	4,866	792	4,074
% (return/release)	100.0%		51.9%	8.5%	43.5%
CONDITIONAL RELEASE	11,484	49.2%	4,648	927	3,721
% (return/release)	100.0%		40.5%	8.1%	32.4%
MAXIMUM EXPIRATION	2,490	10.7%	439	439	(Not Applicable)
% (return/release)	100.0%		17.6%	17.6%	
1985-2012 RELEASES	665,118	100.0%	275,968	96,181	179,787
% (return/release)	100.0%		41.5%	14.5%	27.0%
PAROLE	430,526	64.7%	189,751	62,302	127,449
% (return/release)	100.0%		44.1%	14.5%	29.6%
CONDITIONAL RELEASE	185,145	27.8%	74,588	22,250	52,338
% (return/release)	100.0%		40.3%	12.0%	28.3%
MAXIMUM EXPIRATION	49,447	7.4%	11,629	11,629	(Not Applicable)
% (return/release)	100.0%		23.5%	23.5%	

⁶ Inmates who received determinate sentencing may be first-released on CR date or ME date. Since determinate sentencing was introduced for second violent felony offenders in 1995, first violent felony offenders in 1998, and drug offenders in 2005, the number of conditional releases has increased.

⁷ For the 2012 release cohort, 95% of conditional releases were first releases on the sentence. Among parole releases, only 35% were first releases and 65% had prior releases on their sentence. By restricting the analysis to first releases only, the return rate for rule violations was slightly higher among conditional releases (32%) than parole releases (26%). (See Section Ten for details).

As shown in **Figure 2**, since the 1996 cohort, the total return rate has been fairly stable at approximately 40%, with increasing violation rates and decreasing new conviction rates (see **Appendix A**). The total return rate for the 2012 cohort was slightly higher than the rate for the 2011 cohort (43% versus 42%, respectively). Since 1990, violator return rates have generally increased, while new commitment rates have fallen. The lowest new commitment return rate (8.6%) occurred among 2011 releases; this rate increased slightly among the 2012 release cohort. Among the 2012 cohort, technical parole violations accounted for 78% of all initial returns within three years (7,795 out of 9,953).

Figure 2
Three-Year Return Rates by Return Type: 1985-2012

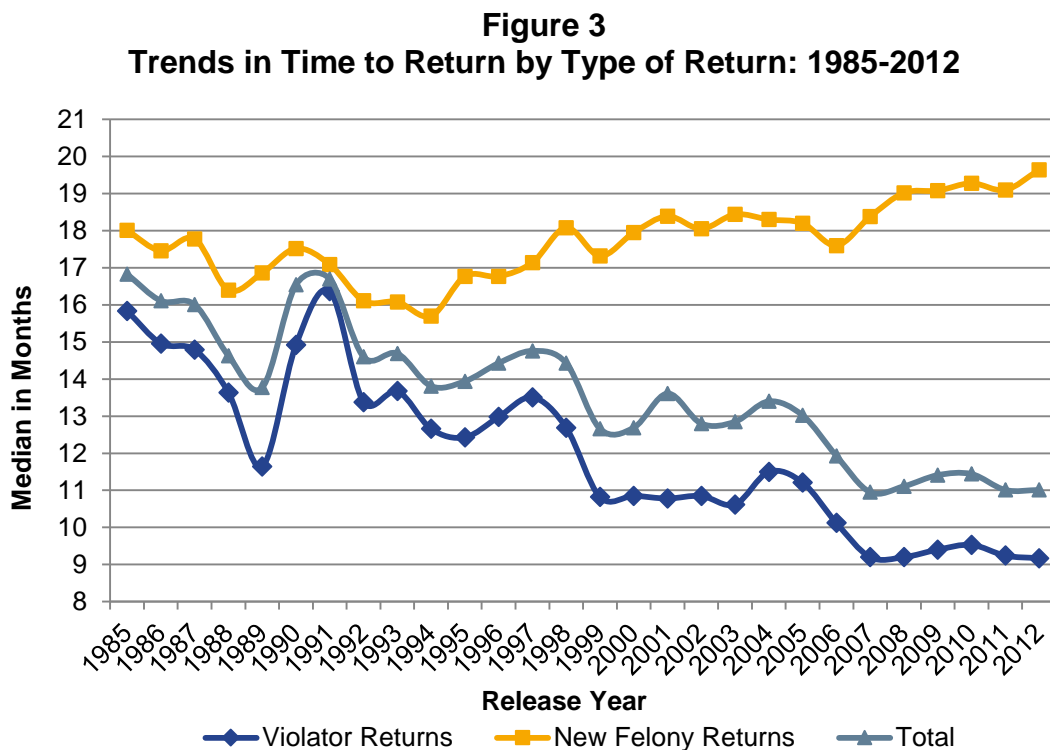

SECTION THREE: TIME TO RETURN

Table 3 presents the number of months from release to readmission for the 2012 releases that returned to DOCCS' custody. The median time-to-return for the 2012 cohort was 11.0 months. This means 50% of offenders returned to prison within a year of release. Of all 2012 releases returned to DOCCS' custody within three years, 85% were returned within 24 months of their release. Parole violators returned more quickly (9.2-month median) than releases who returned as new commitments (19.6-month median).

Table 3
Returns to Custody by Time to Return and Type of Return:
Inmates Released in 2012 and 1985-2012

TIME BETWEEN RELEASE AND RETURN	TYPE OF RETURN					
	TOTAL RETURNED		RETURNED: NEW COMMITMENT		RETURNED: PAROLE VIOLATION	
	#	%	#	%	#	%
2012 RELEASES						
TOTAL RETURNED	9,953	100.0%	2,158	100.0%	7,795	100.0%
1-6 MONTHS	2,532	25.4%	118	5.5%	2,414	31.0%
7-12 MONTHS	2,851	28.6%	360	16.7%	2,491	32.0%
13-18 MONTHS	1,841	18.5%	481	22.3%	1,360	17.4%
19-24 MONTHS	1,271	12.8%	461	21.4%	810	10.4%
25-30 MONTHS	841	8.4%	404	18.7%	437	5.6%
31-36 MONTHS	617	6.2%	334	15.5%	283	3.6%
MEDIAN # MONTHS	11.0		19.6		9.2	
1985-2012 RELEASES						
TOTAL RETURNED	275,968	100.0%	96,181	100.0%	179,787	100.0%
1-6 MONTHS	42,634	15.4%	6,768	7.0%	35,866	19.9%
7-12 MONTHS	78,006	28.3%	20,539	21.4%	57,467	32.0%
13-18 MONTHS	61,440	22.3%	22,645	23.5%	38,795	21.6%
19-24 MONTHS	43,083	15.6%	18,852	19.6%	24,231	13.5%
25-30 MONTHS	29,407	10.7%	15,114	15.7%	14,293	7.9%
31-36 MONTHS	21,398	7.8%	12,263	12.7%	9,135	5.1%
MEDIAN # MONTHS	14.0		18.0		12.0	

As shown in trend lines presented in **Figure 3**, the median time to return dropped substantially among parole violators between 1991 and 1999, and remained at just under 11 months until 2004, when it increased to 11.5 months. Between 2004 and 2007, the median time to return decreased among parole violators from 11.5 to 9.2 months. It has remained steady from 2007 to 2012 at about 9.2 months with a slight increase for the 2010 cohort to 9.5 months. Time-to-return among new commitments has increased since the mid-1990s. The median time to return for new commitments increased from 15.7 months among the 1994 release cohort (shortest recorded) to 19.6 months among the 2012 release cohort (longest recorded).

SECTION FOUR: RETURN RATES BY GENDER

Ninety-four percent of the 2012 releases were males (see **Table 4**). Since females tend to have a slightly shorter length of stay in DOCCS' custody, they are slightly overrepresented in the release cohort compared to an under custody population.⁸ Consistent with previous release cohorts, the rate of return for women offenders released in 2012 was substantially lower than the return rate for men (31% compared to 43%). For female offenders who returned to DOCCS' custody, 84% (374 out of 447) returned for parole violations and 16% (73 out of 447) returned for new offenses. For male offenders who returned to DOCCS' custody, 78% (7,421 out of 9,506) returned for parole violations and 22% (2,085 out of 9,506) returned for new crimes.

Return rates for the 1985-2012 cohort were similar to the 2012 release cohort; females had overall lower return rates than males (29% compared to 42%). For both females and males, the return rate for new commitments was higher for the 1985-2012 release cohort than for the 2012 release cohort.

Table 4
Returns to Custody by Gender:
Inmates Released in 2012 and 1985-2012

RELEASE TYPE AND RELEASE COHORT	TOTAL RELEASED		TOTAL RETURNED		RETURNED: NEW COMMITMENT		RETURNED: PAROLE VIOLATION	
	#	%	#	%	#	%	#	%
2012 RELEASES	23,346	100.0%	9,953	42.6%	2,158	9.2%	7,795	33.4%
MALES	21,893	93.8%	9,506	43.4%	2,085	9.5%	7,421	33.9%
FEMALES	1,453	6.2%	447	30.8%	73	5.0%	374	25.7%
1985-2012 RELEASES	665,118	100.0%	275,968	41.5%	96,181	14.5%	179,787	27.0%
MALES	619,386	93.1%	262,597	42.4%	92,489	14.9%	170,108	27.5%
FEMALES	45,732	6.9%	13,371	29.2%	3,692	8.1%	9,679	21.2%

Returns by gender for individual year cohorts are presented in **Appendix B**.

On the next page, the trends are illustrated graphically. Parole violator returns have been increasing, while new felony returns have been declining. The total return rate among both males and females increased slightly among the 2012 release cohort. This was mostly due to the increase in the returns for new felony conviction. The new felony return rate among males increased slightly from 9% among 2011 releases to 10% for the 2012 cohort. Among females, the return rate for new felonies slightly increased between 2011 and 2012 (4% to 5%).

⁸ On December 31, 2012, 96% of the offenders under custody were male and 4% were female.

Figure 4.1
Return Rates among Male Releases: 1985-2012

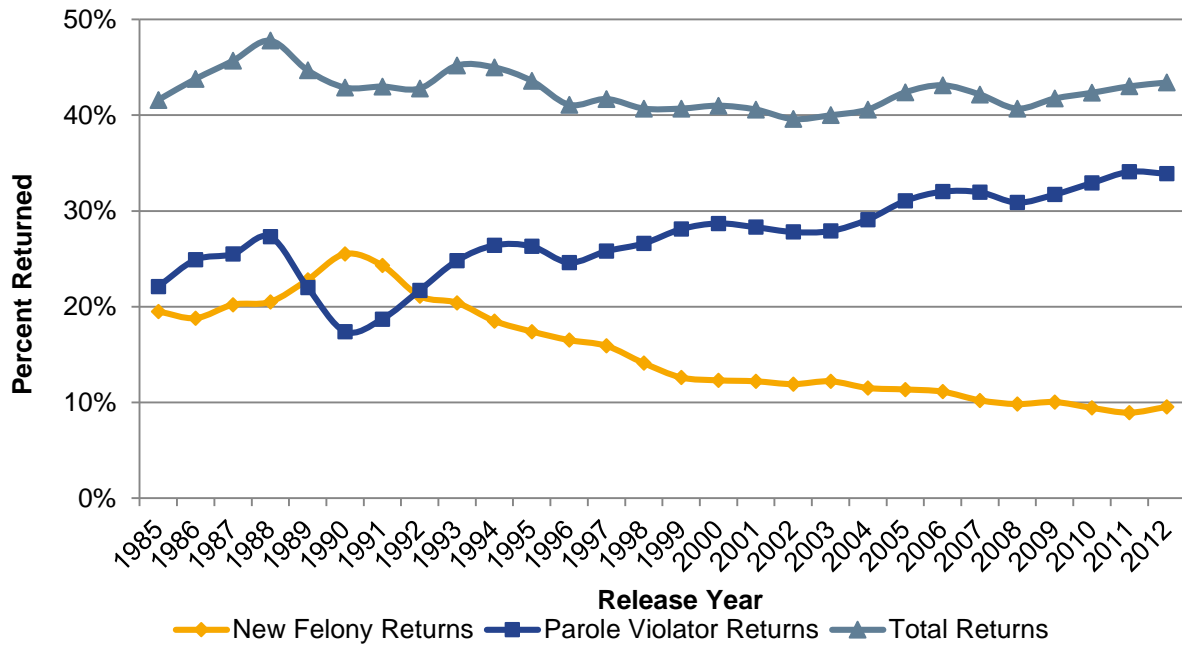

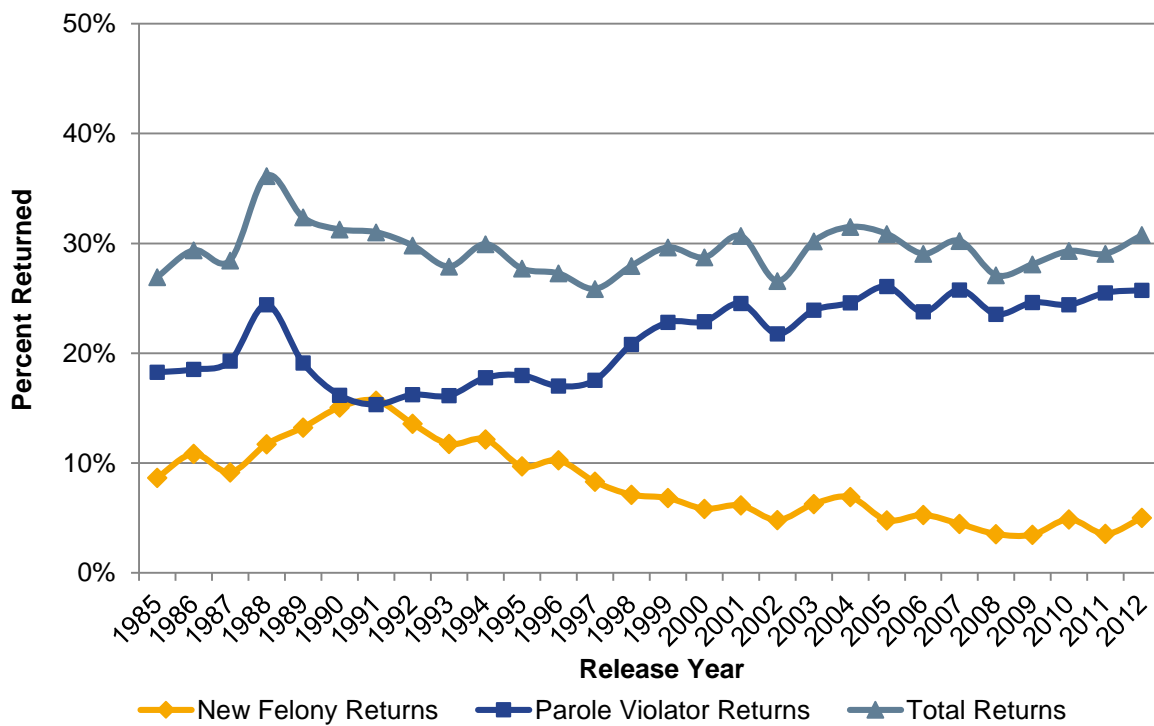

Figure 4.2
Return Rates among Female Releases: 1985-2012

SECTION FIVE: RETURN RATES BY RELEASE CRIME

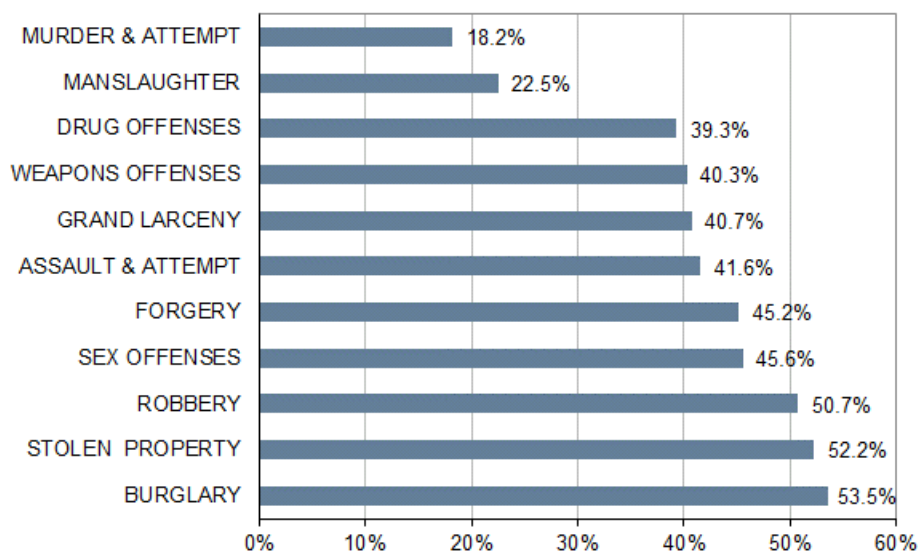

Table 5 presents data on the most serious commitment crime⁹ for releases in the 2012 cohort. Crimes are broken out by major crime categories. Violent Felony Offenses (VFO's) include legislatively-designated violent crimes that invoke certain sentencing mandates and Class A crimes. Other violent or coercive crimes are included under the heading Other Coercive Offenses. Additional major categories include Drug Offenses, Property and Other Offenses, and two headings that denote legal status for young people, Youthful Offenders and Juvenile Offenders.

The total return rates were 46% for Violent Felony offenders, 40% for Other Coercive offenders, 39% for Drug offenders, 42% for Property and Other offenders, 46% for Youthful Offenders, and 28% for Juvenile Offenders.

Among individual crime categories, there were marked differences in the rates of return. Individuals convicted of offenses such as burglary, possessing stolen property, and robbery tended to have the highest rates of return, with about half returning within three years of release. More specifically, the highest rates of return were observed for Burglary 2nd (57%), Robbery 2nd (56%), Possession of Stolen Property (52%), Other VFO Sex Offenses (52%), and Burglary 3rd (52%). Offenders least likely to return within three years were convicted of Business Corruption (7%), Criminally Negligent Homicide (12%), and Murder (12%). Results for the 1985-2012 cohort can be observed in **Appendix C**. Results for the individual release cohorts between 1985 and 2012 are presented in **Appendix D**.

Figure 5.1 presents return rates for selected groupings of crime categories. While offenders with crimes such as burglary, stolen property offenses, and robbery had the highest return rates, offenders released after serving time for murder and manslaughter returned at the lowest rates.

Figure 5.1
Return Rates for Selected Crimes: 2012 Releases

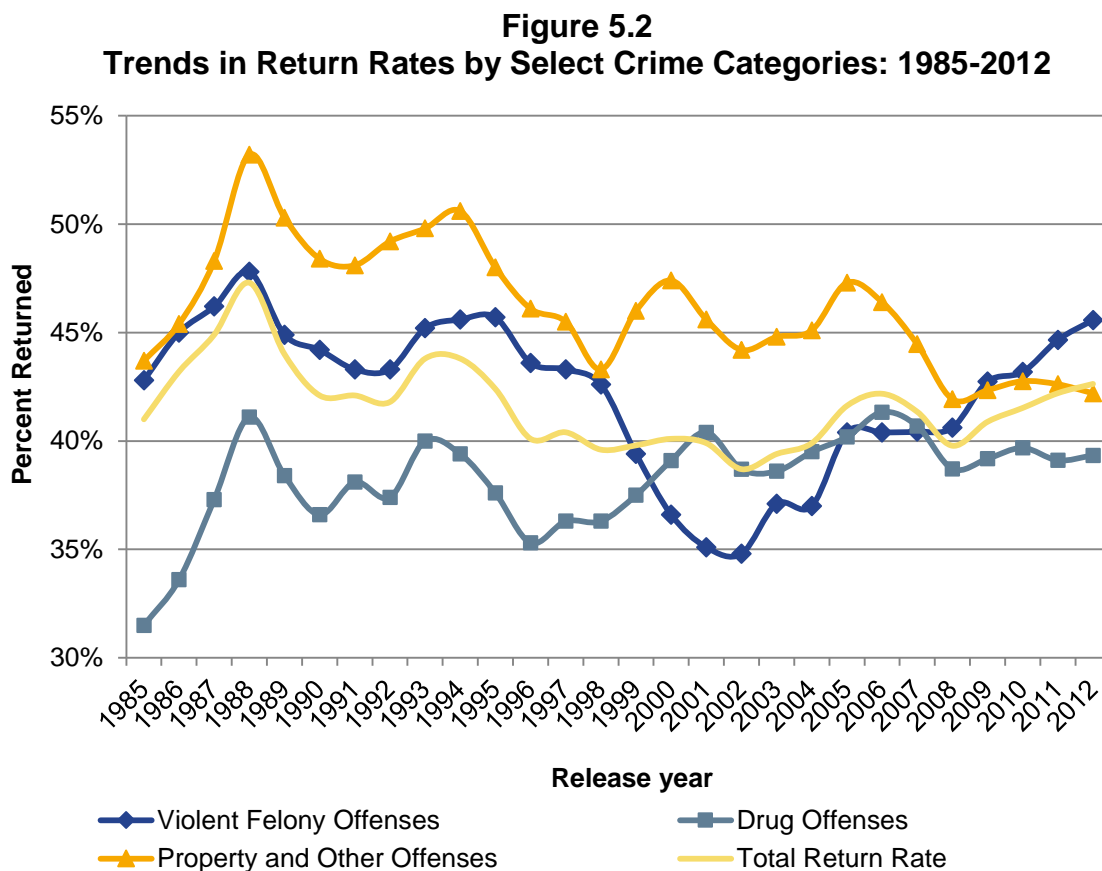

⁹ "Most serious commitment crime" is determined by the crime with the longest maximum sentence.

Table 5
2012 Releases: Most Serious Crime at Commitment by Return Type

MOST SERIOUS CRIME AT COMMITMENT	TOTAL RELEASED	TOTAL RETURNED		RETURNED: NEW COMMITMENT		RETURNED: PAROLE VIOLATOR	
TOTAL	23,346	9,953	42.6%	2,158	9.2%	7,795	33.4%

Figure 5.2 shows trends in total return rates of the annual release cohorts between 1985 and 2012, for select major crime categories and overall. Property and Other offenders consistently returned at a higher rate than offenders in the other crime categories until 2009. The return rate for Violent Felony Offenders (VFOs) decreased in the late 1990s and early 2000s and has increased since 2002. Among the 2011 and 2012 release cohorts, the return rate for VFOs was higher than the return rate for Property and Other offenders.

Between 1996 and 2006, the return rates for drug offenders generally increased (with slight decreases in 2002 and 2003). While drug offenders returned at a lower rate than the other crime categories, their return rate exceeded the rate for violent felony offenders between 2000 and 2004. The return rate for drug offenders peaked in the 2006 release year and decreased thereafter. Beginning with the 2008 release cohort, drug offenders showed the lowest return rates among all crime categories.

Figures 5.3 and **5.4** illustrate some differences in return trends based on type of return. New commitment returns generally declined for every type of offender since 1990. The new commitment return rates reached their lowest point in 2011 and then slightly increased in 2012. Parole violation return rates have generally increased since 1990. The parole violation return rate among violent offenders increased from the lowest return rate crime category in the early 2000s to the highest return rate crime category in 2011, with a slight decrease in 2012.

Trends in New Commitment Returns by Select Crime Categories: 1985-2012

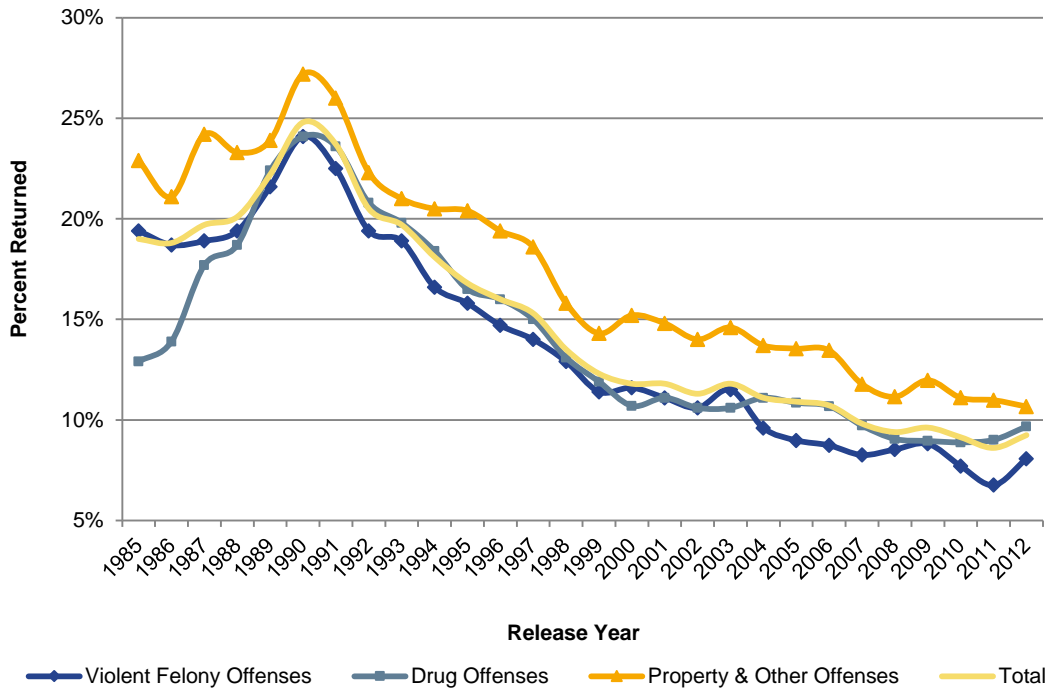

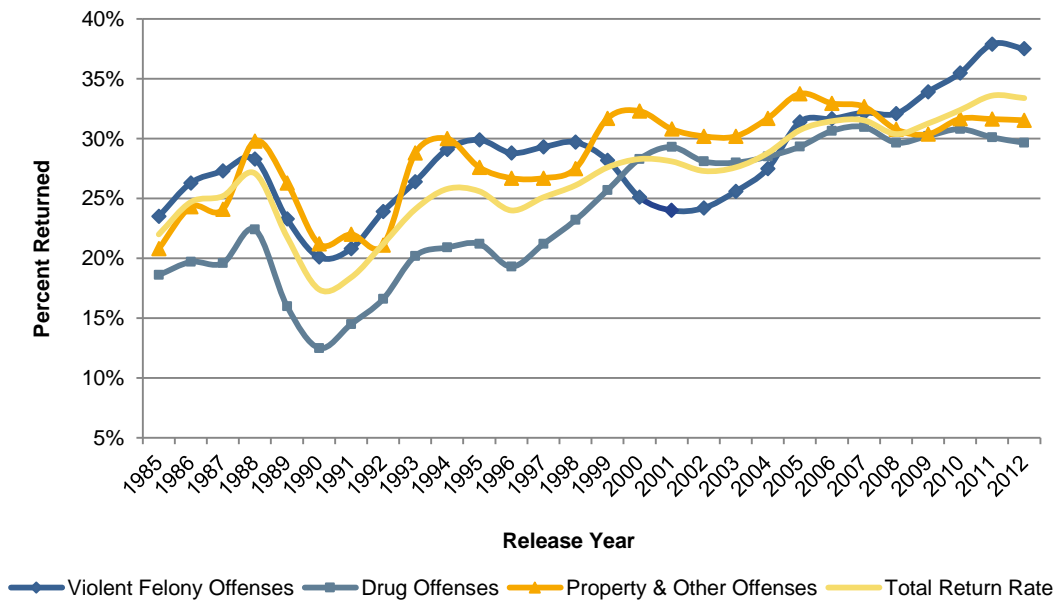

Figure 5.4
Trends in Parole Violation Returns by Select Crime Categories: 1985-2012

SECTION SIX: READMISSION CRIMES

Among the 23,346 offenders in the 2012 release cohort, 2,158 (9.2%) were returned to DOCCS' custody within 3 years of release following conviction for a new felony offense. **Figure 6** and **Table 6** present the crimes for which these offenders were returned to DOCCS' custody. Among 2012 releases returned to prison, more offenders returned for a drug crime than for any other offense category. Thirty-one percent of the 2012 releases who returned within three years for new felony convictions were convicted of drug offenses, 29% were returned for property or other offenses, 27% were returned for violent felony offenses, and 13% were returned for other coercive offenses.

Table 6 also shows new commitment returns for the combined 1985-2012 release cohort. The combined release cohort most often returned for drug offenses (43%), although the return rate for drug offenses has decreased since the 1990s (see **Figure 6**). The return rate for violent felonies decreased until 1999 and increased slightly since then (27% in 2012). The return rate for violent felonies decreased until 1999 and increased slightly since then (27% in 2012).

The gap between the proportion of offenders returned for committing drug offenses and the proportion returned for violent offenses narrowed significantly since the mid-1990s. Among 1995 releases, 51% returned for drug offenses and 23% returned for violent offenses. Among 2012 releases, the return rates for drug offenses was 31% and violent offenses was 27%. The return rate for committing other coercive offenses remained the lowest among the different crime types. **Appendices E.1 and E.2** show return crimes by release crimes for the 2012 and 1985-2012 cohorts.

SECTION SEVEN: RETURN RATES BY AGE AT RELEASE

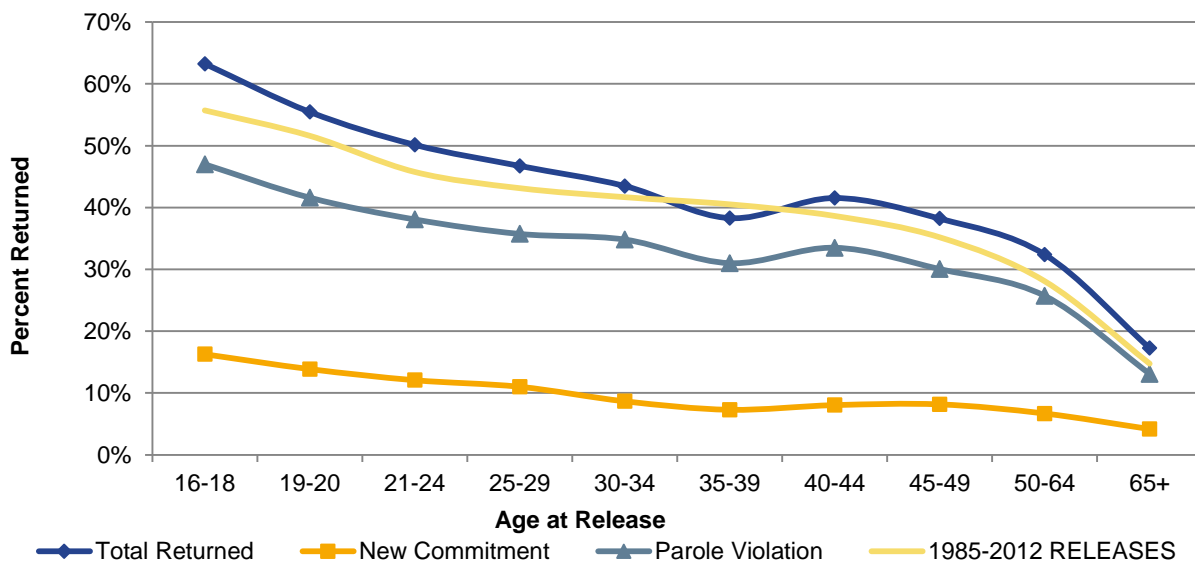

The relationship between return rates and age at time of release is illustrated in **Figure 7** and **Table 7.1**.¹⁰ Since 1985, the average age of releases increased, from 29 among 1985 releases, to 36 among 2012 releases.

Among 2012 releases, 57% of the offenders who were under 21 when released returned to DOCCS' custody within three years, while 42% of those 21 years old or older returned to DOCCS' custody (see **Table 7.1**). Generally, return rates declined as age at release increased, with one exception—similar to recent release cohorts, return rates slightly increased for offenders in their early forties.

The data for the aggregate 1985-2012 cohort shows a steady decline in return rate as the age at release increases. **Appendix F** presents return rates by age at release for the individual 1985-2012 release cohorts.

Table 7.2 shows new commitment returns for the 2012 release cohort by age group. Offenders age 50 or older returned to prison for committing a new crime were most likely to return for committing non-violent Property and Other crimes (45% or 86 out of 192). The highest return rate for offenders under age 50 was among Drug offenders (31%) followed by Violent Felony Offenders and Property and Other crimes, both of which are at 28%.

Figure 7
Return Rates by Age at Release, 2012

¹⁰ Of the 2012 release cohort, 4.2% were under 21. This is comparable to the composition of inmates under custody as of December 31, 2012, when 4.4% of the inmates were under 21.

SECTION EIGHT: RETURN RATES BY ETHNICITY

The ethnic distribution of the 2012 and 1985-2012 release cohorts is presented below in **Table 8**. Of the 2012 releases, 48% were African-American, 26% were White, and 24% were Hispanic. These percentages are similar to those of the under custody offender population at the end of 2012.¹¹

The highest return rate among the 2012 cohort was found for African-American offenders (46%); 42% of the White and 37% of the Hispanic offenders returned. Among the 1985-2012 aggregate cohort, the return rate was the highest for African-American releases (46%), followed by Hispanics (38%) and Whites (37%). While the return rate among African-American offenders has been relatively stable since 1985, the rate among White offenders increased and the rate among Hispanic offenders decreased. (See **Appendix G** for data on ethnicity for individual years.)

¹¹ At the end of 2012, 50% of the inmates under custody were African-American, 24% were Hispanic, 24% were White and 2% were other ethnicities.

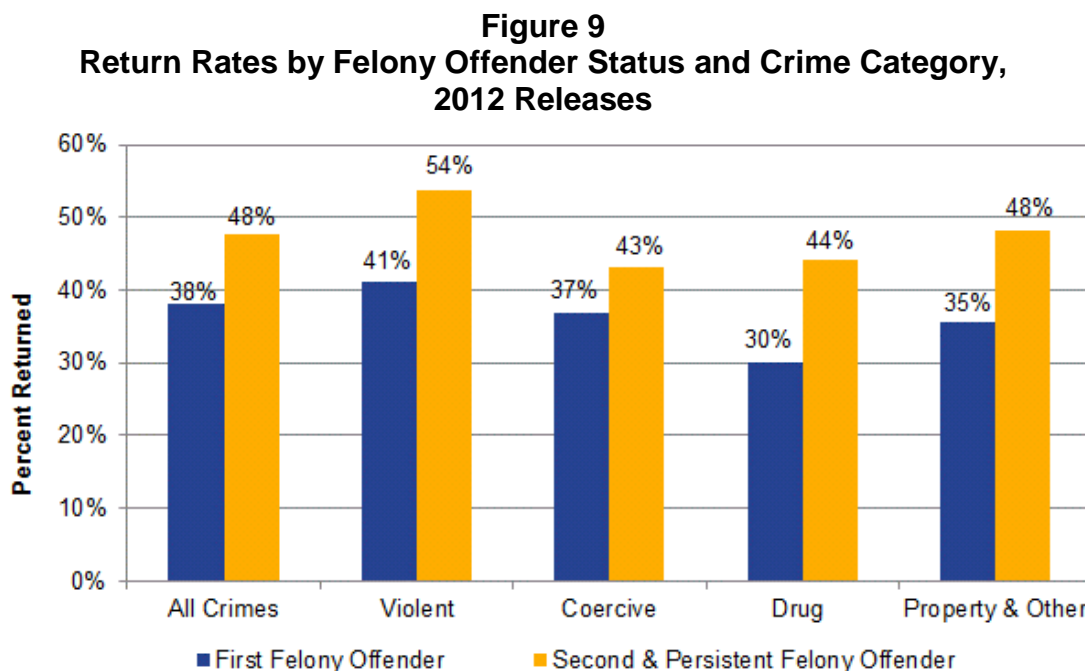

SECTION NINE: RETURN RATES BY CRIMINAL HISTORY

PREDICATE FELONY OFFENDERS

Since 1973, New York State law has provided more severe penalties for a person convicted as a second felony offender. The basic provisions of the second felony offender law mandated an indeterminate prison sentence with a minimum term equal to one-half of the maximum (compared to a limit of one-third the maximum for first felony offenders). In 1995, the New York State Legislature passed the Sentencing Reform Act, which increased the minimum sentence length for first-time violent felons from one-third to one-half of the maximum sentence and imposed a determinate sentencing structure for repeat violent felons. In 1998, the Legislature extended the determinate sentencing to first felony violent offenders and added a period of post-release supervision for violent offenders ranging from one to five years. In 2004, the Legislature again extended determinate sentencing to drug offenders.

Approximately 48% of the 2012 releases were originally sentenced as second felony offenders. Second felony offenders in the 2012 cohort had a higher return rate (48%) than first felony offenders (38%), both overall and within all four crime categories.

Below, **Figure 9** summarizes return data for broad crime categories by felony offender status. More detailed crime information is presented in **Table 9.1** on the following page. The highest rate of return for second felony offenders was found for offenders who committed Violent Felony Offenses (54%). Among first felony offenders, the highest rate of return was found for Youthful Offenders (46%).¹² As shown in **Appendix H**, these patterns held true for the aggregate data.

¹² Youthful Offenders can only be sentenced as first felony offenders.

PRIOR FELONY CONVICTIONS

Table 9.2 presents return rates among offenders with varying numbers of prior felony convictions accumulated before they were admitted to DOCCS' custody for the current offense. Among 2012 releases, the return rate increased as the number of prior felony convictions increased, with the exception of the decrease of returns for those with three prior convictions. The pattern of more experienced offenders returning at a greater rate than less experienced offenders applied to both new commitment and technical violation returns. In the 2012 release year, about half (51%) of the releases with four or more prior felony convictions returned within three years, compared to about one-third (39%) of those with no prior conviction.

Table 9.2
2012 Releases: Number of Prior Felony Convictions by Type of Return

SECTION TEN: RETURN RATES BY FIRST OR PREVIOUS RELEASE

Table 10 presents a breakdown of inmates who were first releases and inmates who had prior releases on their sentences for 2012 and 1985-2012 aggregate release cohorts.¹³ In the 2012 release year, 63% of inmates were first releases to the community, and 37% had been previously released from DOCCS. As shown in the table, inmates who had no prior releases on their sentence were less likely to return than offenders who had been previously released and returned (38% vs. 51%). These differences held for both new commitment and technical violation returns, and for the 1985-2012 releases.

Table 10
Returns among First and Previous Releases
Inmates Released in 2012 and 1985-2012

RELEASE STATUS	TOTAL RELEASED		TOTAL RETURNED	RETURNED: NEW COMMITMENT		RETURNED: PAROLE VIOLATION	
	#	%					
2012 RELEASES	23,346	100.0%	9,953	2,158		7,795	
% (return/release)			42.6%	9.2%		33.4%	
FIRST RELEASE	14,617	62.6%	5,531	1,170		4,361	
% (return/release)			37.8%	8.0%		29.8%	
PREVIOUS RELEASE	8,729	37.4%	4,422	988		3,434	
% (return/release)			50.7%	11.3%		39.3%	
1985-2012 RELEASES	665,118	100.0%	275,968	96,181		179,787	
% (return/release)			41.5%	14.5%		27.0%	
FIRST RELEASE	451,748	67.9%	169,807	59,412		110,395	
% (return/release)			37.6%	13.2%		24.4%	
PREVIOUS RELEASE	213,370	32.1%	106,161	36,769		69,392	
% (return/release)			49.8%	17.2%		32.5%	

Trends in returns by prior release are shown in **Figure 10.1**, **Figure 10.2**, and **Figure 10.3**. The difference in return rates between first and previous releases has been consistent for new commitment returns over time. However, the gap in parole violation returns between first and previous releases widened considerably beginning with the 1992 cohort. The annual rates are presented in **Appendix I**.

¹³ In this section, only prior releases on the sentence for which the inmate was under custody are considered; previous sentences and their corresponding releases, if any, are not included in the determination.

Figure 10.1
Total Return Rates among First and Previous Releases, 1985-2012

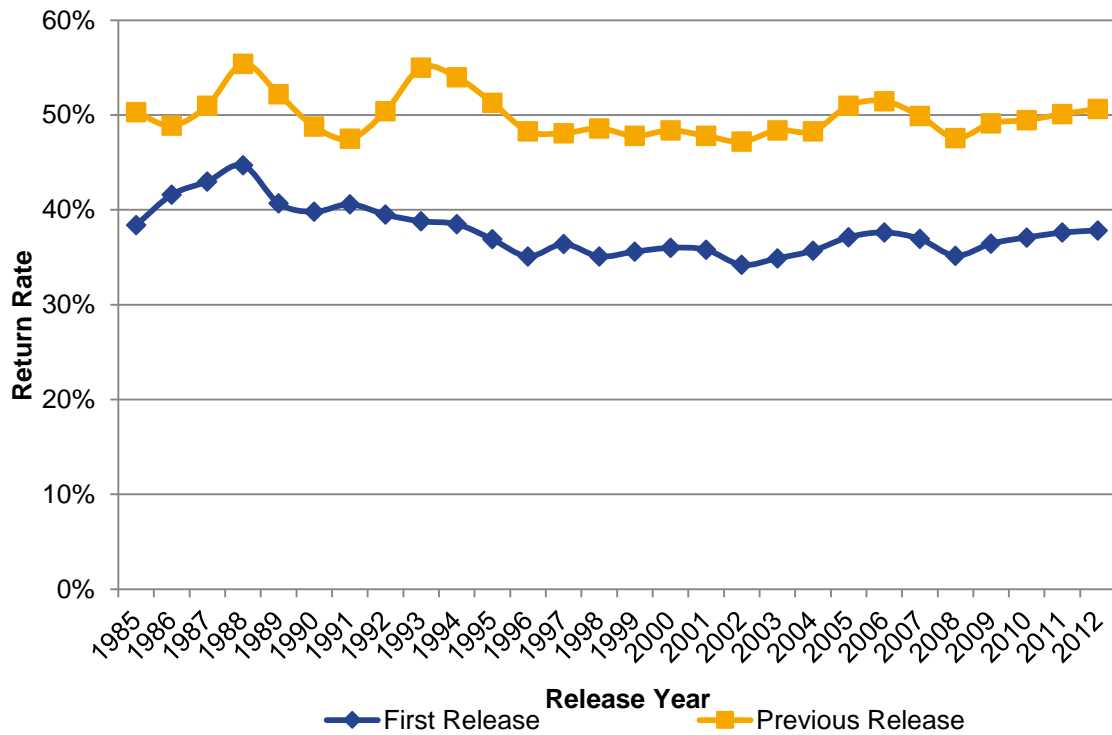

Figure 10.2
Parole Violation Return Rates among First and Previous Releases, 1985-2012

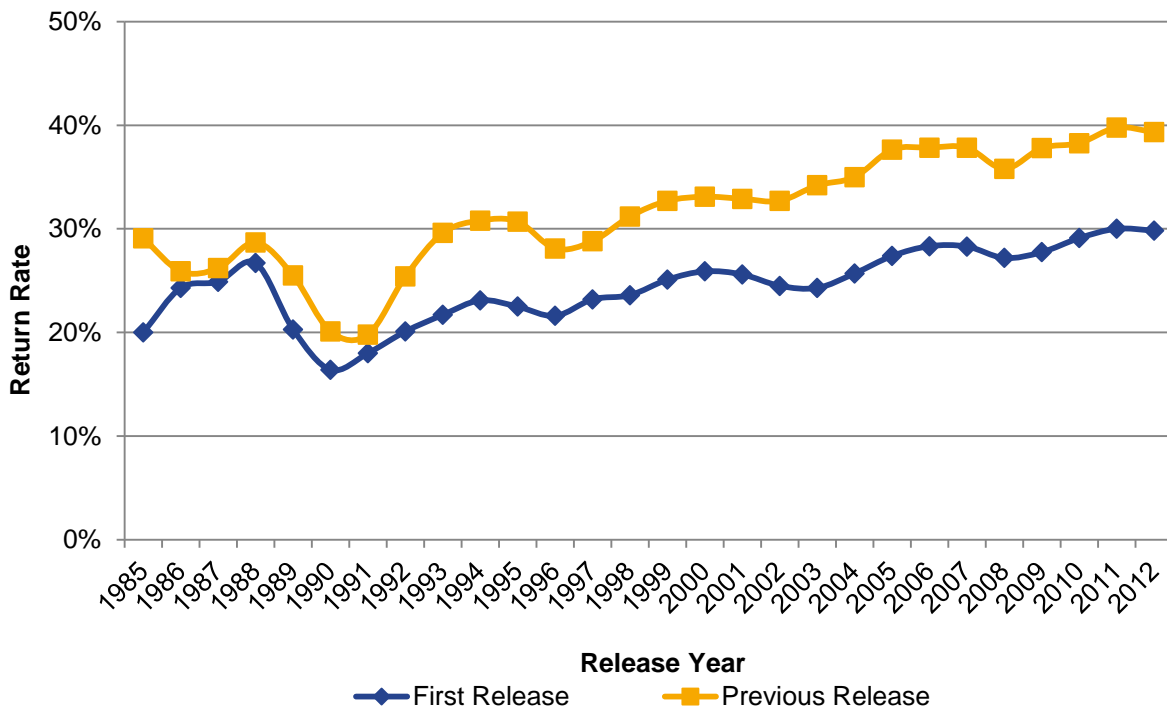

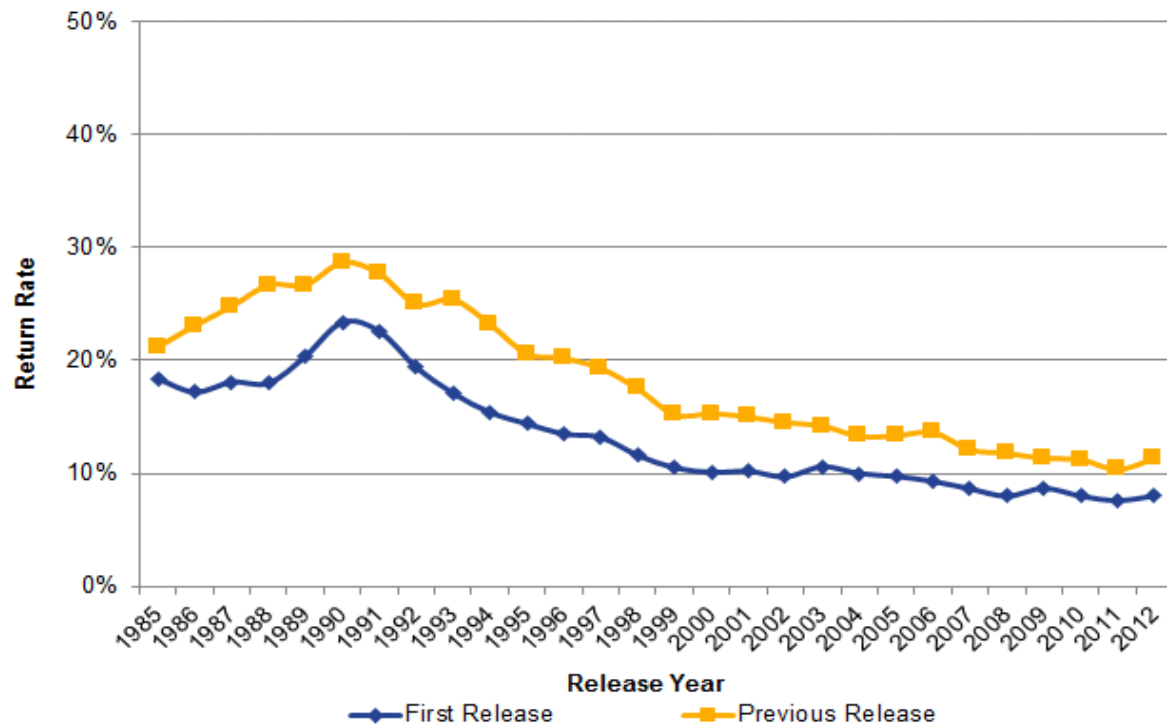

Figure 10.3
New Commitment Return Rates among First and Previous Releases, 1985-2012

SECTION ELEVEN: RETURN RATES BY REGION

Almost half (45%) of the 2012 study population was originally committed from one of the five counties of New York City (10,564 out of 23,346). Upstate Urban counties accounted for an additional 22%; 11% were committed from Suburban New York City counties, and the remaining 21% were committed from other areas of the state.

Among the 2012 releases, offenders from Upstate Urban counties had the highest return rate. Overall, 49% of the releases committed from Upstate Urban counties returned, compared to 45% of those from non-urban upstate (“Other New York State”) counties, 42% of releases from Suburban New York City, and 39% of the releases from New York City.

New conviction rates varied narrowly among the regional groupings: 10% of those from Upstate Urban counties returned for new felonies as did 9% of the releases committed from New York City, 9% of releases from Other New York State counties, and 8% of commitments from Suburban New York City counties. Commitment counties with the lowest new conviction return rates include Queens and Suffolk (7%). Onondaga county in the Upstate Urban region had the highest new conviction return rate (14%).

Most of the Upstate Urban counties also had relatively high parole violation return rates, with an overall violator return rate of 39%, compared to 35% for Other New York State counties, 34% among the releases committed from Suburban New York City, and 30% for releases from New York City. Commitment counties with the highest violator return rates included Monroe (44%), Schenectady (43%), Erie (41%), and Broome (41%), which are all Upstate Urban counties.

Trends in three-year return rates observed for the annual release cohorts differ by type of return and region, as presented in **Figures 11.1 - 11.4**. As shown in **Figure 11.1**, parole violator return rates among New York City commitments increased dramatically in the 1990’s, almost doubling over the time period, while new commitment return rates had an equally dramatic drop. The total return rate has remained at around 40% over the last ten years.

Among Suburban New York City counties, the return rate for parole violations increased since the late 1990’s, with a sharp increase since 2008, while the rate for new commitments generally decreased. In Upstate Urban counties, the return rates for parole violations increased over the last ten years, while new commitment return rates decreased slightly (see **Figures 11.2, 11.3 and 11.4**). Among Other New York State counties, the return rates for parole violations increased slightly, while the new commitment return rates remained about the same. Among Upstate Urban releases, the gap between parole violator returns and new commitment returns increased sharply between 2009 and 2012.

SECTION TWELVE: RETURNS OF DRUG OFFENDERS

Table 12 presents return rates by release type and felony class¹⁴ for offenders originally committed for a drug offense. Overall, 39% of the 6,150 drug felons released in 2012 returned to DOCCS' custody within three years, including 30% percent as parole violators and 10% percent with new convictions.

Fifty-seven percent of the drug offenders released in 2012 were convicted of drug sales; 43% were in DOCCS' custody for drug possession convictions. Offenders convicted of drug sales were more likely to return than those convicted of possession (42% compared to 35%). These differences were attributed to higher levels of parole violation returns among offenders convicted of drug sales (33%) compared to the rates among those in DOCCS' custody for possession (26%). The new felony return rate was same for both drug possession convictions and drug sale convictions (10%). The trends in the return rates of drug offenders were presented in Section Five.

There was considerable variation in the return rates between drug felony classes; A-I and A-II drug felons returned at much lower rates than offenders convicted of less serious drug offenses. This may be a function of the fact that these serious drug felons spent more time incarcerated due to longer sentences and almost 70% of them were first releases.¹⁵ Among the 1985-2012 drug release cohort, new felony returns were generally higher than were found for the 2012 cohort (14% compared to 10%).

¹⁴ New York grades felonies into classes ranging from the most serious, Class A-1, to the least serious, Class E. Sentence length is usually related to offense class.

¹⁵ See Section Ten for discussions of return rates by first/previous releases and time served.

SECTION THIRTEEN: RETURN RATES FOR SUBSEQUENT RELEASE COHORTS

Releases from 2013 and 2014 were followed so that more current trends in return rates could be examined. The 2013 releases were followed for two years, and the 2014 releases were followed for a one year period. The outcomes of these partial follow-ups are compared to the 2012 releases and presented in **Table 13**.

Compared to 2012, the percentage of offenders who returned within 12 months after release was about the same for the 2013 release cohort and slightly lower for the 2014 release cohort. The return rate for the both the 2012 and 2013 release cohorts was 23%, compared with 22% for the 2014 release cohort. The return rate was stable for new commitments (2%), but the return rate for parole violations was slightly lower for the 2014 release cohort (20%) compared with the 2012 and 2013 release cohorts (21%).

The percentage of offenders who returned within 24 months of release also remained the same at 36% among the 2012 and 2013 release cohorts. Finally, the return rates were the same for new commitment returns (6%) and parole violations (30%) among 2012 and 2013 releases.
